

# Next Smile Australia

## The Leading All-on-4<sup>®</sup> Dental Implant Clinics

Dental problems can cause a lot of physical and emotional distress, especially in older adults. As we age, our teeth can deteriorate and become more susceptible to gum disease, which can result in tooth loss. Traditional dentures have long been a solution for those suffering from major tooth loss, but they can come with a variety of problems, including discomfort, slipping, and difficulty chewing. Fortunately, there is a solution that offers a more comfortable and secure alternative to traditional dentures:

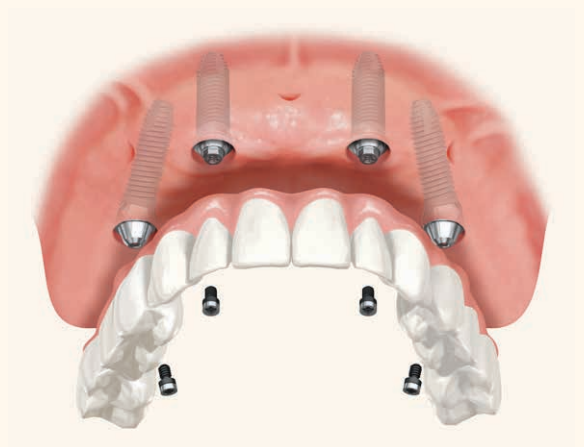

**All-on-4<sup>®</sup> Dental Implants.**

### What are All-on-4<sup>®</sup> Dental Implants?

**All-on-4<sup>®</sup> Dental Implants** are a revolutionary dental implant solution that uses just four strategically placed implants to support a full arch of replacement teeth. This approach allows for a more stable and long lasting solution than traditional dentures, which often require messy adhesives and can still slip or cause discomfort.

**All-on-4<sup>®</sup> Dental Implants** have quickly become a popular choice for older adults who have suffered from tooth loss or other dental problems. This implant treatment offers a number of benefits over traditional dentures. With proper care and maintenance, the implants can last for many years, providing patients with a beautiful, functional smile for decades to come.

## Why All-on-4<sup>®</sup> Dental Implants are a great solution for older adults

**All-on-4<sup>®</sup> Dental Implants** are particularly well-suited for older adults who have suffered from dental problems such as tooth loss, gum disease, or poor outcomes from traditional dentures. Here are just a few reasons why:

### 1. Improved Chewing Ability

One of the primary benefits of **All-on-4<sup>®</sup> Dental Implants** is improved chewing ability. With traditional dentures, it can be difficult to eat certain foods or to chew properly. This can lead to a number of health problems, including malnutrition and digestive issues.

**All-on-4<sup>®</sup> Dental Implants** provide a much more stable and secure foundation for replacement teeth, which allows for better chewing ability. This can have a significant impact on a person's overall health and quality of life.

### 2. Increased Confidence and Self-Esteem

Another significant benefit of **All-on-4<sup>®</sup> Dental Implants** is increased confidence and self-esteem. Traditional dentures can be uncomfortable and often slip or shift, which can make it difficult to speak, smile, or eat in public. This can be a major source of embarrassment and self-consciousness for many older adults.

**All-on-4<sup>®</sup> Dental Implants** provide a more natural-looking and secure solution that can help boost confidence and self-esteem. Patients can eat, speak, and smile with greater ease and without fear of their replacement teeth slipping or shifting.

### 3. Long-Lasting Results

**All-on-4® Dental Implants** provide a long-lasting solution for tooth loss and other dental problems. Traditional dentures may need to be replaced every few years, while **All-on-4® Dental Implants** can last for decades with proper on-going care.

This can be a major advantage for older adults who may not want to undergo frequent dental procedures. **All-on-4® Dental Implants** provide a long lasting solution that can offer peace of mind.

### 4. Natural Feel

Traditional dentures can be uncomfortable and even painful for some patients, especially if they do not fit properly or if they cause irritation to the gums or mouth. **All-on-4® Dental Implants** are the closest thing to natural looking teeth that modern dentistry can provide and importantly feel just like natural teeth.

### 5. Improved Oral Health

**All-on-4® Dental Implants** can also improve overall oral health. When teeth are lost or damaged, it can lead to more complex dental and health issues. **All-on-4® Dental Implants** provide a stable and secure foundation for replacement teeth, which can help prevent these types of problems.

Importantly **All-on-4® Dental Implants** act to stimulate the jawbone which is critical in helping maintain its density, strength and integrity. This is something that traditional removable dentures cannot provide and will over time typically lead to that sunken facial look that comes from loss of supporting jaw bone structures. This loss of bone, called "Bone Resorption", can often lead to denture wearers looking many years older than is actually the case.

# Why choose Next Smile Australia

Next Smile Australia is a leading national provider of **All-on-4® Dental Implants** procedures.

Next Smile Australia performs this procedure with unparalleled clinical rigour, backed by 25 years of clinical research data. Our surgical approach, known to be the Gold Standard, means we are the only **All-on-4® Dental Implant** provider in Australia endorsed by Professor Malo, the European inventor of the ground breaking **All-on-4® Dental Implants**. Our experience is lead by the fact that we have a sole focus of providing **All-on-4® Dental Implants** procedures – all day every day.

## The Next Smile “2 Bridge Protocol”

One of the unique aspects of our Gold Standard approach is the “2 Bridge Protocol,” where we fit a set of provisional teeth (bridge) on the day of surgery for the first 6 months. This allows us to assess important features like bite alignment, look and feel, phonetics, while your mouth heals and adapts to the implants and teeth. After healing is complete and you have had your ‘teeth review’ with your surgeon, our master craftsmen in our Next Smile Labs design and refine your final fixed teeth (bridge)

based on your preferences for teeth shape, colour, lip support, and more. This meticulous process helps towards achieving the Smile of Your Life, with the guidance of your surgeon in post-surgery follow-up appointments.

Unlike some **All-on-4® Dental Implant** providers who fit “final teeth” immediately on the day of surgery before any healing has occurred, our “2 Bridge Protocol” ensures that your dental implants have fully integrated with the jaw bone for optimal success. Another benefit is that your provisional teeth are safely archived by us, so you can easily have them temporarily refitted in case of any repair of your final teeth in the future. So you are never without teeth.

## Teeth crafted for beauty and durability

At Next Smile Australia, we are committed to providing teeth that are built for both beauty and durability. Our final teeth (bridges) come with a unique internal milled titanium bar, similar to steel reinforcing in concrete, ensuring maximum strength and durability.

## Where our Experience Shines

Our experience in performing **All-on-4® Dental Implant** procedures is unparalleled, with our dental surgeons having performed more procedures than most other clinics in Australia. We also only partner with other specialist and experienced professionals, ensuring the best possible outcomes for our patients.

## Built for purpose

We believe that a safe surgical environment is critical and is the hallmark of our success as Australia's leading **All-on-4® Dental Implant** provider. Our Super Clinics are state-of-the-art facilities purpose-built for **All-on-4® Dental Implant** procedures, designed to the highest standards of a surgical facility to leave nothing to chance. Most of our Super Clinics also have on-site Next Smile Labs, where the teeth (bridges) are crafted to perfection.

Having our Labs on-site ensures a higher level of quality control, ensuring that you receive genuine **All-on-4® Dental Implants**, bridge components and excellent craftsmanship.

## The Next Smile Australia Warranty

We provide a comprehensive warranty for your new set of teeth, including the implants and final teeth (bridges), offering reassurance for a smile that can last a lifetime with proper home care and regular professional care.

---

Our genuine Nobel Biocare Swiss made **All-on-4® Dental Implants** come with a: **5-year warranty.**

The final bridge consists of two parts:  
Titanium Bar: **5-year warranty**  
Teeth: **3-year warranty**

Our warranty is honoured by all of our Super Clinics across Australia.

---

While some people may find cheaper providers for **All-on-4® Dental Implant** treatment overseas, it's important to note that any warranties offered on an implant or bridge failure may require a return trip overseas to fulfil. This can be inconvenient and comes with the risk of traveling in discomfort, especially if you are suffering from complications as a result of your surgery.

# Why choose Next Smile Australia

## Aftercare for your new smile

Once your final teeth are fitted, maintaining your new smile is made easier with a simple and straightforward care regime. While your teeth won't be affected by tooth decay like natural teeth, it's still important to practice good oral hygiene and regularly visit our professional Next Smile dental hygienists for teeth cleaning and teeth (bridge) checks.

Our unparalleled level of care extends before, during, and after your procedure, giving you the confidence to maintain your new teeth. Your Next Smile Australia treatment coordinator will provide personalized recommendations and advice on diet and ongoing maintenance based on your unique situation.

Additionally, you can be reassured that your new, natural-looking teeth are fully covered by our Next Smile Treatment Warranty, as long as you follow our recommended maintenance schedule.

## Dental Payment Plans

At Next Smile Australia, we believe that all Australians should have access to the dental care they need, which is why we offer a range of dental payment plans to ensure they can receive the treatment they deserve. In fact, over 50% of our patients take advantage of the payment plans we have on offer.

**Our focus is on creating personalised solutions for our patients. That is why we have a range of options available for you to consider against your needs and preferences.** Our team at Next Smile Australia is dedicated to guiding you through the financing paperwork, making the process smooth and easy.

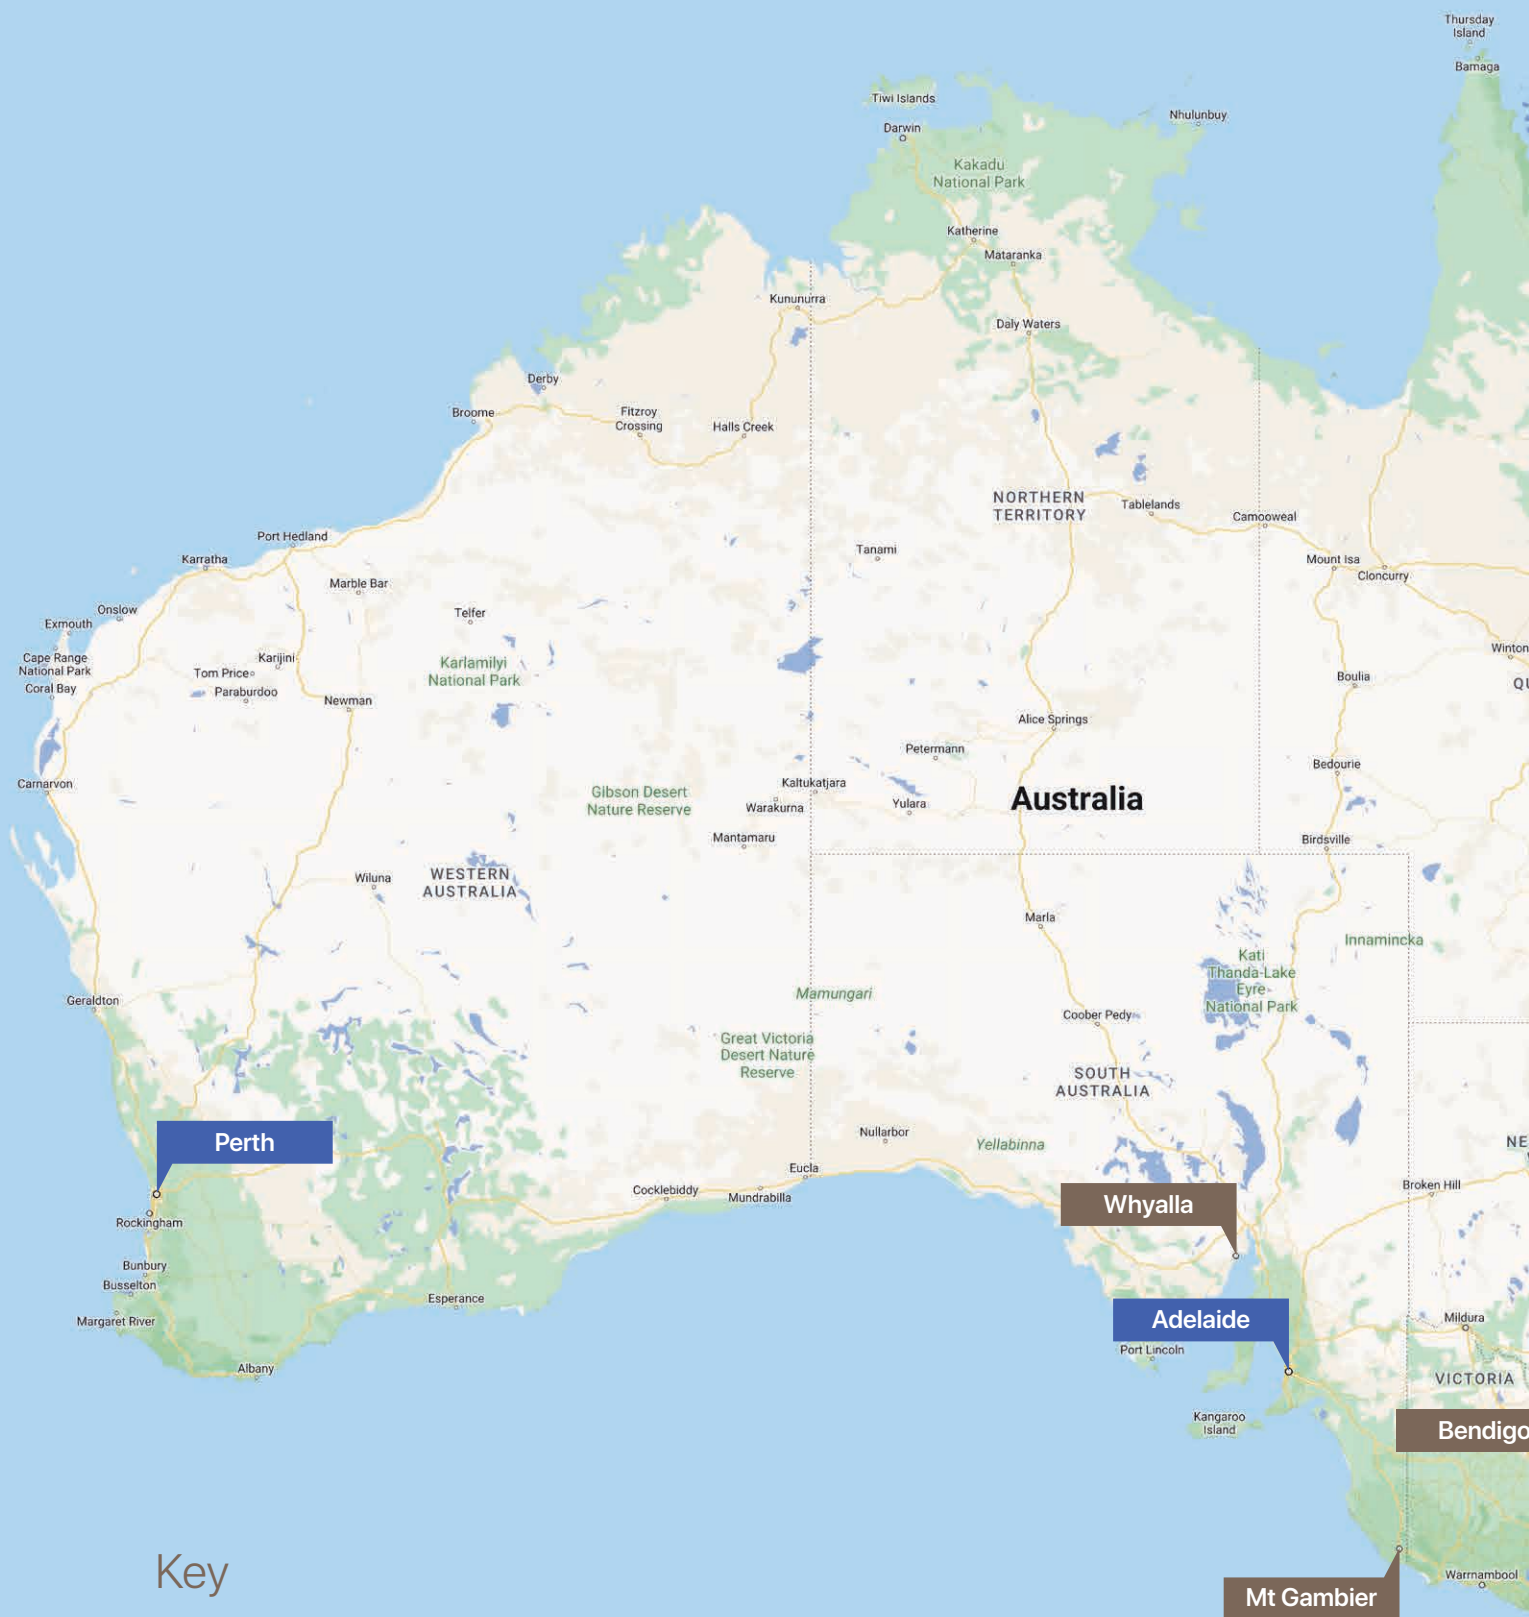

To make things even more convenient, we offer a 5% discount for upfront payment on either a single or double arch. We also have dental payment plans and financing options available, starting from \$140/week\*, with a range of pricing options designed to suit your needs.

Furthermore, we can help you navigate the process of accessing the early release of Superannuation funds on compassionate grounds through Supercare. If eligible we will assist you in making the process as seamless as possible.

## Key

All-on-4® Dental Implant Super Clinics

Regional Accredited Partners

## Why choose Next Smile Australia

Treatment you can trust wherever you live

With a growing network of dedicated **All-on-4® Dental Implant Super Clinics** and **Accredited Partner Clinics** across Australia, the journey to the Smile of Your Life couldn't be closer.

### Option A

For those patients living nearby one of our six metro area **All-on-4® Dental Implant Super Clinics**, you have the convenience of having your journey completed in the one location. This includes:

- Initial consultations
- Day of surgery and fitting of your provisional teeth (bridge)
- Post-surgery reviews and fitting of your final permanent teeth (bridge)
- Ongoing recommended cleaning and maintenance schedule.

### Option B

For our patients living in regional areas, you have the convenience of undergoing your **All-on-4®** treatment at your nearest **Accredited Partner Clinic** including:

- Initial consultations
- Post-surgical reviews and fitting of your final permanent teeth (bridge)
- Ongoing recommended cleaning and maintenance schedule.

The only time you will need to travel to your nearest **All-on-4® Dental Implant Super Clinic** is for the day of your surgery.

Our **Accredited Partner Clinics** offer the ease of accessing our advanced treatments locally. All **Accredited Partners** offer the skills, knowledge, experience and care that Next Smile Australia is renowned for. They have undertaken extensive education programs to ensure they maintain the level of excellence our **All-on-4®** procedures promise.

## The 5 step All-on-4<sup>®</sup> Dental Implant treatment journey

### Step 1: All-on-4<sup>®</sup> Consultation

The first exciting step towards achieving your new smile is meeting with one of Next Smile Australia's leading **All-on-4<sup>®</sup>** team or Accredited Partner dentists. In a judgment-free space, they will delve deep into your dental and health background, assessing your situation, personal goals, and suitability for **All-on-4<sup>®</sup>** treatment. They will walk you through the **treatment** process, using 3D scans of your jawbone, digital impressions, and photographic imaging to provide a complete picture of the current state of your smile and the possibilities to come.

**Step 2: Diagnosis and Treatment Preparation** The results of your consultation are carefully assessed, and your surgeon or dentist delivers a personalized diagnosis regarding your suitability for **All-on-4<sup>®</sup> Dental Implants**. A tailor-made treatment plan that meets your needs and preferences is then prepared for you. Next Smile Australia Labs will begin the process of crafting your new provisional teeth based on your 3D scans and digital impressions, so they are ready for fitting within 24 hours of your surgery, though often on the same day.

### Step 3: All-on-4<sup>®</sup> Surgery

Four Nobel Biocare implants of the highest quality are strategically inserted into your jaw, providing a solid foundation for your new smile. Upon waking or within 24 hours of your surgery, your stunning set of provisional teeth will be revealed to you.

### Step 4: Post-Surgery

While you are enjoying your new provisional teeth, Next Smile Australia Labs are meticulously manufacturing and refining your new final teeth to your preferences. To achieve our leading 98% success rate\*, our post-surgery MALO protocol includes assessing your healing, health, and the stability of your new implants. Trial fittings of your new final teeth are done to ensure optimal fit, shape and colour preference, so that your teeth can be fitted to your needs and desired outcomes.

### Step 5: Aftercare

Following all aftercare instructions provided by your Next Smile Australia team is crucial. The MALO protocol, which leads to the best and most predictable **All-on-4<sup>®</sup> Dental Implant** outcome\*, emphasizes the importance of good oral hygiene and regular professional cleaning, even though the dental implants and the bridge of teeth are not prone to tooth decay like natural teeth. With recommended regular care, **All-on-4<sup>®</sup> Dental Implants** can be long lasting. Next Smile Australia's commitment to safety and patient care is backed by our **All-on-4<sup>®</sup> Dental Implant Warranty**.

# 2023 Price List

## Transparent “No Surprises” Pricing

We understand that the All-on-4<sup>®</sup> treatments represent a significant investment. We believe it’s an investment that will pay many different dividends.

We are transparent in our pricing so you can judge for yourself exactly what Next Smile Australia offers compared to other providers. We present the fees in a way that helps you understand the costs for the entire treatment process, using our Gold Standard Malo Protocol for All-on-4<sup>®</sup> treatments.

One price upfront for your entire treatment means no unexpected surprises, and Next Smile Australia offers a 5% discount for upfront payment on either a single or a double arch.

You may also take advantage of payment options tailored to your needs.

A common misconception about dental pricing.

It is common to hear that “dentistry is really expensive”. However All-on-4<sup>®</sup> Dental Implants are actually priced very similar to other crucial and involved medical procedures.

### Hip Replacement

Average price:

**\$31,820**

Average out of pocket cost:  
\$1,120

### Knee Replacement

Average price:

**\$26,975**

Average out of pocket cost:  
\$1,080

## All-on-4<sup>®</sup> Single Arch \$27,000\*

What's included in your Next Smile Australia All-on-4<sup>®</sup> Single Arch fee?

- A no-obligation consultation with our caring Next Smile Australia team with the option of an extended consultation and a comprehensive diagnosis with a Next Smile Australia dentist or surgeon.
- Your All-on-4<sup>®</sup> dental implant surgery performed by a highly experienced Next Smile Australia dental surgeon trained By Dr Malo, the inventor of the All-on-4<sup>®</sup> treatment concept.
- Treatment at one of Australia's leading All-on-4<sup>®</sup> dental implant clinics, which are purpose-built and feature state-of-the-art facilities offering the highest levels of care and treatment.
- A set of natural-looking provisional teeth within 24 hours but often on the same day of your **implant** surgery.
- Detailed reviews monitoring your healing and the function of your new smile between your first set of provisional teeth and your final teeth.
- Our two-step process means we provide your final teeth (your second set) after you have trialled your new provisional teeth. This helps provide final teeth that fit, look and feel as natural as real teeth that are personalised to your smile needs and goals.
- Compassionate and warm aftercare that offers you the guidance and support you need right through to the end of your All-on-4<sup>®</sup> treatment journey.
- The reassurance of a full warranty on your new set of teeth, including the implants and final bridge, for a smile that can last a lifetime with good home care and regular professional care.

---

\* Anaesthetic costs are additional, however Medicare rebates are available.

## Your payment options

You can take advantage of a number of payment plans offered by external finance providers. These enable you to get your All-on-4<sup>®</sup> Dental Implant treatment today and pay for it over a period of time that works best for you.

Below is an overview of some of the finance options offered by external providers, so you don't have to wait to start your journey to a bright new smile. Your treatment coordinator will discuss your options in more detail during your consultation.\*

Supercare allows you to get early release of your superannuation on compassionate grounds. Permission to access your super is given by the Australian Tax Office, with a number of requirements that must be met before the funds will be released.

It's important to note that under this option, a flat patient fee of \$680 is taken from your super fund, and you will be taxed an additional 22% in addition to the withdrawal amount.

Humm offer two different loan options:

Borrow up to \$15,000 over a 30 month term  
Or borrow up to \$30,000 over a 48 month term

For example, if you borrow \$27,000 for the All-on-4<sup>®</sup> treatment, you would pay a 10% deposit of \$2,700, with an interest-free loan from Humm of \$24,300 over a 48 month payment term. Your payments would be \$117/week over 208 weeks.

---

TLC offers loans from \$2,001 up to \$50,000. Next Smile Australia will be paid the full treatment cost within 24 hours of your application being approved. Loans can be provided for all forms of employment, and if you are receiving Centrelink payments you can still access a loan up to \$5,000. Other features include:

- Lowest medical segment interest rates for good credit scores.
- No early payout fees.
- Flexible terms up to 84 months.

EziDebit offers a simple loan set-up with no credit checks and a minimal administration fee. You pay 50% up front and then pay the balance off over the next 6 - 12 months in equal monthly installments. You can pay by credit card or EFTPOS and nominate the date of the direct debit each month.

Loans of up to \$30,000 are offered by ZIP Money. The options to pay for your All-on-4<sup>®</sup> treatment include:

Borrow \$27,000 and receive 12 months interest free.

Borrow \$20,000 with a \$7,000 deposit and receive 18 months interest free

Borrow \$17,000 with a \$10,000 deposit and receive 24 months interest free

Loans include a \$99 establishment fee and a \$7.95 monthly account fee.

\*Payment Plan options accurate as of July 2023, and may be subject to change from time to time.

## Meet Our Experienced Next Smile Australia Team

Your primary objective should be to identify a highly skilled team who possess genuine experience. To minimize dental implant risks, you need a team who are leaders in **All-on-4® Dental Implants**, performs the procedure as a routine process and is willing to provide each patient with the insight and information they need to make informed decisions. When you choose Next Smile Australia for your treatment, you can be confident that we have the team of professionals you need for this type of care.

Being honoured with the **All-on-4® Centre of Excellence award** by the world leading Swiss Dental Implant manufacturer Nobel Biocare is further acknowledgement of what thousands of our patients already know.
